

Nigel O Toole

Front-end Web Developer

pure@purestructure.com
purestructure.com

I am an enthusiastic and self-motivated person that loves developing websites. I create attractive websites, built using best practices that deliver an excellent user experience and I enjoy working as part of a team on challenging projects.

Experience

McCormack & Morrison

mccormackmorrison.com

Mar 2014 - Present
London, U.K.

Senior Front-end Web Developer

- Created the front-end of websites for important clients and assisted the back-end developer integrating the project into the CMS. These included Wordpress, Sitecore and Umbraco.
- Projects were created to be responsive with a mobile-first approach using HTML5, CSS3, SASS, JavaScript, jQuery and Angular.
- Developed the front-end template and style guides with a custom Yeoman generator utilising Bootstrap, NPM, Bower and Grunt.

Aro

aro.ie

Sept 2009 - Jan 2014
Galway, Ireland and London, U.K.

Lead Front-end Web Developer

- Developed projects for high priority clients, ensuring they received a polished product that satisfied their needs within schedule. I was responsible for all the front-end and most of the back-end development on my projects, in collaboration with the team.
- Worked on a wide variety of projects including responsive websites, mobile specific websites, multi-lingual websites, booking engines for hotels, e-shops, micro-sites and email templates.
- Developed the in-house front-end framework used by the in-house CMS. I updated this periodically to add functionality, make updates and fix bugs. I created a logical, semantic and adaptable codebase which shortened project build times.
- As Team Leader I managed the front-end team, mentored junior members and oversaw small updates to client websites. I reviewed all projects built, as part of our quality assurance process.
- Responsible for documentation and procedures for the design department including site-map, functionality specification and quality assurance process.
- Advised the sales team when creating proposals and assisted Project Managers when scheduling projects and updates.

Martec

martec.ie

Jan 2007 - Sept 2009
Galway, Ireland

Front-end Web Developer and Designer

- Designed websites in consultation with clients and developed both the front-end and back-end of the website. This involved creating bespoke ASP.Net solutions for a number of clients.
- Updated the in-house framework to ASP.Net from ASP which included URL rewriting and W3C compliance.

Hollygate Designs

hollygatedesigns.ie
Dec 2004 - Dec 2006
Carlow, Ireland

Web Developer and Designer

- Designed websites to the clients' specifications in Photoshop and developed the website using XHTML, CSS and ASP.Net.

About

In my free time I enjoy surfing the internet, reading and playing computer games. I go to the cinema often and like watching TV but I try to keep fit by running and going to the gym regularly. I like being creative so I enjoy arts and crafts especially origami and visiting museums.
